Harbor extension Lanzarote

Client:
Dragados SA

Main contractor:
Government of Canary Islands

Location:
Orzola Harbor, Lanzarote; Spain

Date:
September 2004 - May 2005

Case study

Orzola harbor is located on the north of the Canary Island Lanzarote. Dragados SA has build a gulf breaker for the Harbor extension. We worked from a small Jack up barge, the Thames 12J343, on which the fibro block, drill rig, drill string and all auxiliary equipment was placed.

After vibrating the casing DDC drilled with the PBA810 1400mm holes.
