## Rhyl Flats Offshore Wind Farm

Client:  
**RWE Npower Renewables Ltd.**

Main contractor:  
**MTHøjgaard A/S**

Location:  
**Liverpool Bay**

Date:  
**April 2008- August 2009**

### Case study

In 2009 Ballast Nedam Offshore Energy as a sub-contractor of MTHøjgaard pile-drove and drilled 25 foundations for the Rhyl Flats Offshore Wind Farm, located 8 km north east of Llandudno North Wales. It is Wales second offshore windfarm in Liverpool Bay. These foundations has been successfully installed from the heavy lift vessel Svanen march-august 2009. Each monopile is app. 4,7 m diameter and weigh 200 tons.

During this job DDC was standby with the Wirth PBA 936 with a drill bit with 4400mm diameter. This PBA 936 is hydraulically driven by a Power pack and works with the reverse air lift drilling principal.
